

Product Introduction

Direct-mount Grass Catcher System for Riding Greens Mowers

At John Deere, we're committed to providing hardworking, long-lasting parts for your operation. That's why we created our new **Direct-mount Grass Catcher System** for riding greens mowers. This new system is designed to retain clippings by reducing the air volume and routing it out of the catcher. The system is fixed to the same plane as the reel, which allows the catcher to follow the contour exactly as the reel, maximizing the volume of grass thrown into the catcher. Easy installation/removal helps increase operator productivity, and overlap marks promote straightly-mowed passes.

The direct-mount grass catcher is included with attaching yoke order code 3202 when ordering new machines. The following attachments are required to install the direct-mount grass catcher system:

- Front Grass Catcher Mounting Kit (BM24900; qty 2)
- Front Grass Catcher (BTC10630; qty 2)
- Front Yoke Kit (BTC10655; qty 1)

Available on JDParts.com and through John Deere dealers.

The Direct-mount Grass Catcher System is compatible with the following machines:

- 2500B PrecisionCut™ Riding Greens mowers with Quick-Adjust 5 cutting units
- 2500E E-Cut™ Hybrid Riding Greens mowers with Quick-Adjust 5 cutting units
