Safes
Premium protection from fire and theft
Some things in life you just can’t control – fire, theft, and the spontaneous, unpredictable acts of children. That’s why it’s important to secure your valuables and guns in a safe place.

John Deere offers a complete line of high-quality, affordable safes that combine superior craftsmanship, certified fire protection, and U.L. Listed security for ultimate protection of your valuables. When it comes to securing your valuables and giving you peace of mind, there is nothing like a John Deere safe.

In the event of a fire or attempted break-in, your investments are protected:

- No cost for replacement safe
- No cost to transfer warranty
- No cost for delivery and installation
- Safe is guaranteed for life against fire and theft

Keep your valuables safe for generations to come
John Deere Safes outlast the competition

Security Features

It’s what’s inside that counts, according to Underwriter’s Laboratory. During one test, they stated the John Deere hardplate system is one of the best in the industry! That is reassuring and explains why every John Deere safe bears the UL symbol of security.

1. New Tough Doors™ – Thicker composite doors resist prying and increase fire protection
2. Internal ball-bearing hinge ensures a tighter secure lockup
3. Triple-layered and ball-bearing hardplates thwart even UL safe crackers
4. Thicker, more numerous bolts extend longer and resist prying
5. Thicker bodies are robotically welded for tougher welds and stronger safes
6. UL listed electronic and mechanical locks trigger when drilled or torched
7. Over-center direct-drive mechanisms protect against side bolt punching
8. Spring loaded external relockers lock-up the mechanism when punched or drilled
9. Anti-pry tabs increase pry resistance by 300%
10. SureTight handle ensures no thief can break the lock by torquing the handle

Special Security Feature: Every John Deere safe is pre-drilled for bolt-down security to prevent theft of the safe and discourage prying.

Fire Protection Features

In a head-to-head fire test, where both safes were tested for 60 minutes, our Premium Series safes proved to have 42% more fire protection than the competition’s. Without the added protection from a John Deere safe, your valuables could go up in smoke.

Key reasons John Deere safes are the best in fire protection:

- More 5/8” fireboard interlocked in ceiling, walls, doorjambs and door
- Thicker steel in body and door slows down heat penetration
- The most effective heat expanding door seal to reduce smoke and heat

Add it all up and you’ll see why our safes are the best fire-rated safes on the market today.

The thicker the steel, the better the security and fire protection of a safe. Each John Deere safe is built with the finest steel to produce a beautiful finish while maintaining high security and protection. Quality pickled and oiled steel give our safes a clean, smooth finish and long-lasting durability. A unique roll-form process with robotic welding eliminates the top weld for greater strength and produces a uni-body design that is unequalled in the industry.

BEST LIFETIME WARRANTY IN THE INDUSTRY!

If your JOHN DEERE safe ever experiences a fire or attempted break-in—we’ll repair or replace it at no charge to you for as long as you own it. Now that’s sweet!

- FREE Opening and Removal of Damaged Safe
- FREE Delivery and Installation of Replacement Safe
- FREE Transferable Warranty to New Owner if Sold
- TOLL-FREE Service with Nationwide Certified Dealers and Locksmiths. (800) 247-5625
- INCLUDES 5-Year Lock and Paint Warranty

A SAFES WARRANTY IS ONLY AS GOOD AS THE COMPANY STANDING BEHIND IT.
John Deere Safes
Step Up to Better Meeting your needs with the right Security and fire ratings

Value Series
Best in class for entry level safes

John Deere’s Value Series is engineered to defend valuables better than any other entry-level safe on the market. We put John Deere’s Value safes to the test. In head to pry tests, the Value Series proved to be 6x stronger, showing once again Liberty’s 4” locking bars and CNC 2 piece body is head and shoulders above the competition. Each safe is certified for 30 minutes of fire protection, including multiple layers of fire board. If you’re on a budget, you just found the smart safe!

Security Features
1. 1” thick security and composite fire door
2. Extra hardplate for drill protection
3. UL listed electronic lock
   - 2-piece CNC 14 gauge body
   - Direct drive mechanism with dual action stabilizer to keep bars engaged
   - 10 four inch military style locking bars (6x stronger in pry tests)
   - Anti-pry gussets to increase rigidity in door
   - Single point slip clutch handle to resist torquing
   - Durable granite finish exterior

Fire Protection Features
Time/Temp. rating: 30 minutes @ 1200° BTU heat rating: 62,000 BTUs
Fireboards: UL 5/8” Thick 8 total: Ceiling – 3 layers; walls and door jambs – 1 layers; door – 3 layers
Door seal: Palusol (7x heat expansion)

Economy Series
Affordably priced with value-added features

John Deere Economy Series safes pack more features and upgrades at a great price than the average entry-level safe.

John Deere’s Economy Series safes are fire-certified for 30 and 40 minutes and include an extra layer of fireboard in the ceiling, door jambs and door. Both models are UL Listed and include our formidable triple hardplate system to keep thieves at bay.

Available in two popular sizes and two colors, these economical safes are sure to be a very satisfying investment.

USA Security Features
1. Direct drive mechanism
2. Triple layered hardplates
