

Product Introduction

14 Blade Reel

At John Deere, we're committed to providing hardworking, long-lasting parts for your operation. That's why we created our **14 Blade Reel**. This reel offers the ability to lower your frequency of clip, which is defined by the distance traveled between consecutive cuts. By lowering the frequency of clip, you can produce a smooth, clean cut that increases the playability of the putting surface.

This reel is available to install on Quick Adjust 5 (QA5) cutting units and 180SL/220SL PrecisionCut™ Walk Greens Mowers.

Available on JDParts.com and through John Deere dealers.

Part numbers:

- TCA23624 – 180SL PrecisionCut Walk Greens Mowers
